I. CONTRACT DOCUMENTS & TECHNICAL SPECIFICATION

- A. Section 01025 (Measurement & Payment), replace page 01025-3 with attached revised page adding paragraph 3.4.B which addresses the need for a paint containment system and payment of.
-

END OF ADDENDUM NO. 1

weather months and rye grass during cool weather months. Permanent grass will consist of Bermuda or centipede grass. Disturbed areas may have to be re-seeded multiple times to establish vegetation. Payment will be paid by the units shown on the bid form (acres or area grassed). Payment will be one time with no additional payment for repeat applications.

3.3 EARTHWORK

- A. Earthwork will be considered as an incidental item to the construction of the tank, water treatment building, and pipe. Payment for earthwork will be included in the payment of these other items.

3.4 ELEVATED WATER TANK

- A. Payment will be lump sum for completion of each stage of construction: foundation, fabrication, painting and pipe installation between the base of the riser and storage tank. The cost of such work and all costs incidental thereto shall be included in the price bid for the item to which the work pertains.
- B. With the close proximity of the proposed tank to the existing fire station, a paint containment system will be needed for painting of the tank. The containment system is considered an incidental item in the painting of the tank. The contractor will need to include the cost of the containment system in the line item cost for tank painting.
